Nationality: Pakistani | Availability: Immediate | Open to Relocation

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3+ years of experience delivering scalable, production-ready web and desktop applications across healthcare, storage, and enterprise sectors. Specialized in TypeScript, React.js, Node.js, and RESTful API development with a proven track record of improving application performance, reducing security vulnerabilities, and shipping high-quality features in fast-paced Agile environments. Immediately available and open to relocation.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript (ES6+), Python
Frontend:	React.js, Next.js, Vue.js, React Native (Android and iOS), Redux Toolkit, Tailwind CSS, Material UI
Backend:	Node.js, Express.js, REST APIs, GraphQL, WebSocket, JWT Authentication, RBAC
Desktop:	Electron.js (Offline and Hybrid Online/Offline Applications)
Databases:	MongoDB, PostgreSQL, MySQL, SQLite, Stored Procedures, Database Design and Optimization
Tools:	Git, GitHub, Agile/Scrum, Postman, Figma, Cloudinary, Vercel, Unit Testing, Integration Testing

WORK EXPERIENCE

Frontend Developer

May 2025 – Present

CodeBrill | AI and Legal Tech

- Architect and deliver scalable UI systems using TypeScript, React.js, Vue.js, and Tailwind CSS, reducing component development time by 35% through reusable design patterns adopted across the entire team.
- Drive frontend engineering on an AI-powered Legal Document Management System, enforcing strict TypeScript type safety and performance optimization across a codebase serving enterprise clients.
- Collaborate in Agile sprints with product and backend teams, consistently delivering production-quality features on schedule with zero critical post-release bugs.

Full Stack Developer

Oct 2024 – Apr 2025

Twenty Four Storage Company | Storage and Logistics

- Engineered end-to-end full-stack applications using TypeScript, React.js, Node.js, and Express.js, improving overall system reliability and reducing downtime by 40% through optimized architecture.
- Designed and implemented a multi-layered RESTful API with JWT authentication, role-based access control, and server-side validation, eliminating critical security vulnerabilities across the platform.
- Established a full unit and integration testing suite that increased code coverage to 80% and cut production regression bugs by 50%.

MERN Stack Developer

Mar 2024 – Sep 2024

Tech Emulsion | Software Development Agency, Peshawar

- Delivered 5+ full-stack MERN applications with TypeScript integration, owning the complete development lifecycle from database schema design to production deployment.
- Designed optimized MongoDB schemas and reusable React component libraries that accelerated feature delivery by 30% across multiple client projects.
- Converted Figma designs into pixel-perfect, fully responsive interfaces across mobile, tablet, and desktop, achieving 100% design accuracy on all delivered projects.

Frontend Developer Intern

Apr 2023 – Nov 2023

Tech Pioneer | Software Development

- Developed reusable React.js component libraries during an 8-month structured program, with components integrated directly into the production codebase and praised in senior code reviews.
- Participated in full Agile sprint cycles including planning, standups, and code reviews, gaining end-to-end exposure from UI design through deployment and post-launch iteration.

KEY PROJECTS

Sehatkor - Healthcare Platform | [sehatkor.pk](#)

[TypeScript](#) | [MERN Stack](#) | [WebSocket](#) | [Cloudinary](#) | [Redux Toolkit](#)

- Production-grade healthcare platform connecting patients with doctors, hospitals, labs, and pharmacies in real time, serving live users with zero runtime crashes since launch.
- Engineered WebSocket-powered live chat, JWT authentication, RBAC, and a complete appointment booking system on a scalable RESTful backend.

KCD Notify - Administration Web App

[MERN Stack](#) | [Node.js](#) | [Email API](#) | [WhatsApp API](#) | [React.js](#)

- Digitized result distribution for Khyber College of Dentistry, replacing manual processes and reducing notification delivery time from days to seconds.
- Built automated Email and WhatsApp broadcast system with a secure RBAC admin dashboard, improving institutional communication efficiency significantly.

Medicore PMS - Desktop Pharmacy Management System

[Electron.js](#) | [React.js \(TypeScript\)](#) | [Node.js](#) | [PostgreSQL](#) | [SQLite](#)

- Architected a fully offline-capable desktop pharmacy management system using Electron.js and TypeScript, with real-time POS billing, automated inventory tracking, and daily sales reporting.
- Implemented a subscription-based licensing system supporting multi-location deployments, with hybrid cloud sync planned for Phase 2.

EDUCATION

BS Software Engineering | Islamia College University, Peshawar

2020 – 2024

CERTIFICATIONS AND ACHIEVEMENTS

- Programming with JavaScript - Meta (Coursera)
- Basics and Advanced React - Meta (Coursera)

LANGUAGES

English (Professional) | Urdu (Native) | Pashto (Native)
